Superior customer service

Satisfy your customers

LS One can help you provide outstanding customer service. Impress your customers and insure repeat business by:

- Speeding up your check-out lines
- Giving product information at the POS
- Offering loyalty programs with customized special offers
- Handling exchanges, returns and voids fast and easily
- Accepting multiple payments types, including gift cards and foreign currency

Total supervision

Have your operation under control

Run a well-organized and profitable business. You can use LS One's retail-specific functions to:

- Analyze your sales and achieve your targets
- Control staff access to operations on the POS
- Check and review end-of-day operations
- Increase your sales with up-selling and cross-selling tools
- Streamline and oversee your inventory at any time
- Change discounts and prices with a click for whole groups of products

Supporting your future

Optimize your business strategy

LS One's powerful reporting functionality will help you interpret and understand all of your business's key facts and figures, so that you can take informed decisions regarding your company's future. Use LS One's reports to monitor best-selling items, customer transactions, sales per hour/staff member/customer – and more. You can easily add customized reports to the system.

Dynamic and flexible

Integrate with your current ERP

Do you already have an ERP or back office system? LS One can be connected to any ERP system through its intelligent integration architecture. Use LS One as your front office, to handle your sales and customer-facing tasks. Thanks to the seamless flow of data from the ERP to the POS and back, your key data will always be correct and up-to-date. LS One has been successfully integrated with ERP solutions such as SAP, Oracle and Microsoft Dynamics.
